PROFESSIONAL SUMMARY

Project delivery professional with 6+ years of experience coordinating projects across construction, manufacturing, digital, and creative environments in India and the UK, currently a Junior Project Manager at archVi coordinating photo and video shoot delivery for national clients. I have built project control frameworks covering trackers, stage gates, and risk and issue registers, run stakeholder sign-off cycles and design-to-construction handovers, and coordinated cross-functional teams across time zones from brief to client sign-off. MSc in Engineering Management; PRINCE2 7 Foundation and Certified ScrumMaster (CSM) certified.

CAREER HIGHLIGHTS

- Built a five-part project control framework for a steel fabrication firm and surfaced a drawing-verification failure that had forced full rework.
- Cut average project lead times by 20% across UK and India teams by redesigning cross-team handoffs, with no added headcount.
- Coordinated resourcing and vendor delivery on Government of India vessel programmes worth over Rs. 100 Crores.

CORE SKILLS

- Project Planning, Sequencing & Scheduling
- Risk, Issue & RAID Management
- Stage-Gate & Governance Controls
- Stakeholder Management & Client Sign-off
- Cross-Functional, Vendor & Freelancer Coordination
- Resource Planning & Milestone Tracking
- Status Reporting & Power BI Dashboards
- PRINCE2 | Scrum (CSM) | Agile | Waterfall
- MS Project, Jira, Advanced Excel, Power BI

PROFESSIONAL EXPERIENCE

Junior Project Manager 10/2026 - Present

archVi | Prographer, Client Servicing | Bengaluru, India

- Coordinate photo and video shoot delivery for national hospitality and food-delivery clients through a pan-India network of freelance photographers and cinematographers, from restaurant alignment and briefs to edited delivery and client review.
- Designed a stage-gate shoot tracker with a RAID log, photographer register and dashboard that flags at-risk shoots, QC turnaround and no-shows.
- Introduced a two-stage restaurant readiness checklist (day before and 2 hours before) after shortfalls traced to restaurant staffing and prep delays, logging causes and actions in the RAID log.
- Wrote photographer SOPs, mobile-friendly shoot guidelines and a camera-angle guide that turn client quality standards into clear shot lists, image counts, angles and delivery rules.
- Prepared dish-by-dish backdrop and camera-angle plans for restaurant menu shoots, aligned to the client's photography quality standards.
- Audited team quality dashboards, finding 9 of 145 pipeline shoots counted twice and reworked shoots counted as passes; wrote an improvement report with metric definitions, rework reason codes and a 43.5% Bengaluru rework baseline.
- Oversee in-house photographer quality for my manager, reviewing lighting, angles, set condition, pace and QC outcome.
- Maintain a register of 40 freelance vendors by city, service type and priority to plan coverage and backups.

Project Management Consultant (Freelance) 06/2026 - 08/2026

Technibs (Steel Fabrication & Pre-Engineered Buildings) | Adoor, Kerala, India

- Engaged as an independent consultant to build a structured project and production control framework from scratch, layered onto an established delivery process to make it easier to track, document, and improve.
- Ran a structured operational diagnostic that surfaced a drawing-verification failure on a hospital project, where finished pillars needed full rework because a third-party design had not been verified, and confirmed welding as the production bottleneck; presented prioritised corrective actions to leadership.
- Designed a five-part project control workbook (Project Master, Production Tracker, Stage-Gate Checklist, Lessons Log, Risk & Issue Register), sequencing a welding time log as the highest-value first deliverable.

- Coordinated across production, vendors, and management, flagging delivery risks around labour shortage, space constraints, and grid power dependency with clear owners and mitigations.
- Advised on operations and commercial strategy, including a diversification idea to convert scrap metal into window and door frames as a new revenue line and adjacent market.

Creative Operations Coordinator (Freelance) 01/2025 - 05/2026

Joozz Designing Limited | London, UK (Remote)

Key engagements: brand identity projects (logos, business cards, collateral); brand and website development builds

- Managed end-to-end delivery of digital and creative projects for corporate clients across the UK and India, owning scope, schedule, and quality from brief through to final client sign-off.
- Coordinated design-to-development handoffs on brand and website builds, securing client sign-off at each stage before handover.
- Acted as the central point of contact and coordinated cross-functional teams across time zones, keeping stakeholders aligned throughout.
- Cut average project lead times by 20% by redesigning cross-team handoffs, with no additional headcount.
- Sustained a 90%+ client satisfaction rate and brought production error rates to zero via a live RAID log and a pre-delivery quality-assurance step.

Project Coordinator 01/2024 - 06/2024

Kettidam Constructions | Kerala, India (Remote from UK, Part-time)

- Coordinated handover of finalised 3D apartment designs into construction: routed each design to stakeholders for confirmation or correction, managed revision cycles, and enforced stage-gate sign-off before release to site.
- Built a PMO governance framework from scratch, standardising reporting templates, escalation protocols, and project tracking across the organisation for the first time.
- Designed Power BI dashboards that gave leadership real-time visibility while cutting manual reporting effort by 30%.
- Delivered 100% on-time milestone execution via a predictive RAID log that flagged resource bottlenecks up to four weeks in advance.

Digital Marketing Specialist 10/2020 - 11/2022

Naveena Zeal Technologies & sister company Thekkanath Technologies (T-TECH) | Kerala, India

- Built the digital presence of sister company Thekkanath Technologies (T-TECH) from scratch: set up its website and social channels, launched and monetised its YouTube channel, and established a profitable Amazon seller account before launching its paid campaigns.
- Managed 10+ concurrent projects at a 95% on-time delivery rate, including a full website rebuild coordinated end to end from requirements to release.
- Planned and ran SEO and paid campaigns across Meta, Google, YouTube, and Amazon for both T-TECH and Naveena Zeal, an established packaging machinery manufacturer with 30 years in the market, growing global market share by 15% and opening new international B2B partnerships.
- Built a HubSpot CRM automating tracking, follow-ups, and reporting, improving team workflow efficiency by 20%.
- Identified untapped product lines that competitors lacked, opening a new profitable revenue stream.

Production Supervisor 08/2018 - 08/2020

Ship On Tech, Cochin Shipyard Ltd | Kerala, India

- Coordinated resourcing and vendor delivery on Government of India vessel programmes worth over Rs. 100 Crores, maintaining 100% audit-ready compliance records.
- Redesigned production workflows using Value Stream Mapping, reducing operational waste by 15% and pushing on-time delivery to 95%.
- Coordinated across production, procurement, and management to keep delivery on schedule.
- Maintained detailed process and compliance records that stood up to external audit and government review.

EDUCATION

Master of Science, Engineering Management | Anglia Ruskin University, Chelmsford, UK | 2024

Relevant subject: Project Management Systems

Bachelor of Technology, Mechanical Engineering | Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), Tamil Nadu, India | Awarded 2021

CERTIFICATIONS

PRINCE2 Foundation | PeopleCert | 2025 • Certified ScrumMaster (CSM) | Scrum Alliance | 2026
